

EXERCISE

PICTURE PERFECT

Objective:- To give participants an opportunity to work in teams to compare and contrast the details of two similar pictures.

Group Size:- Unlimited. Participants will work in groups with a maximum of four members each.

Time Required:- Ten to fifteen minutes.

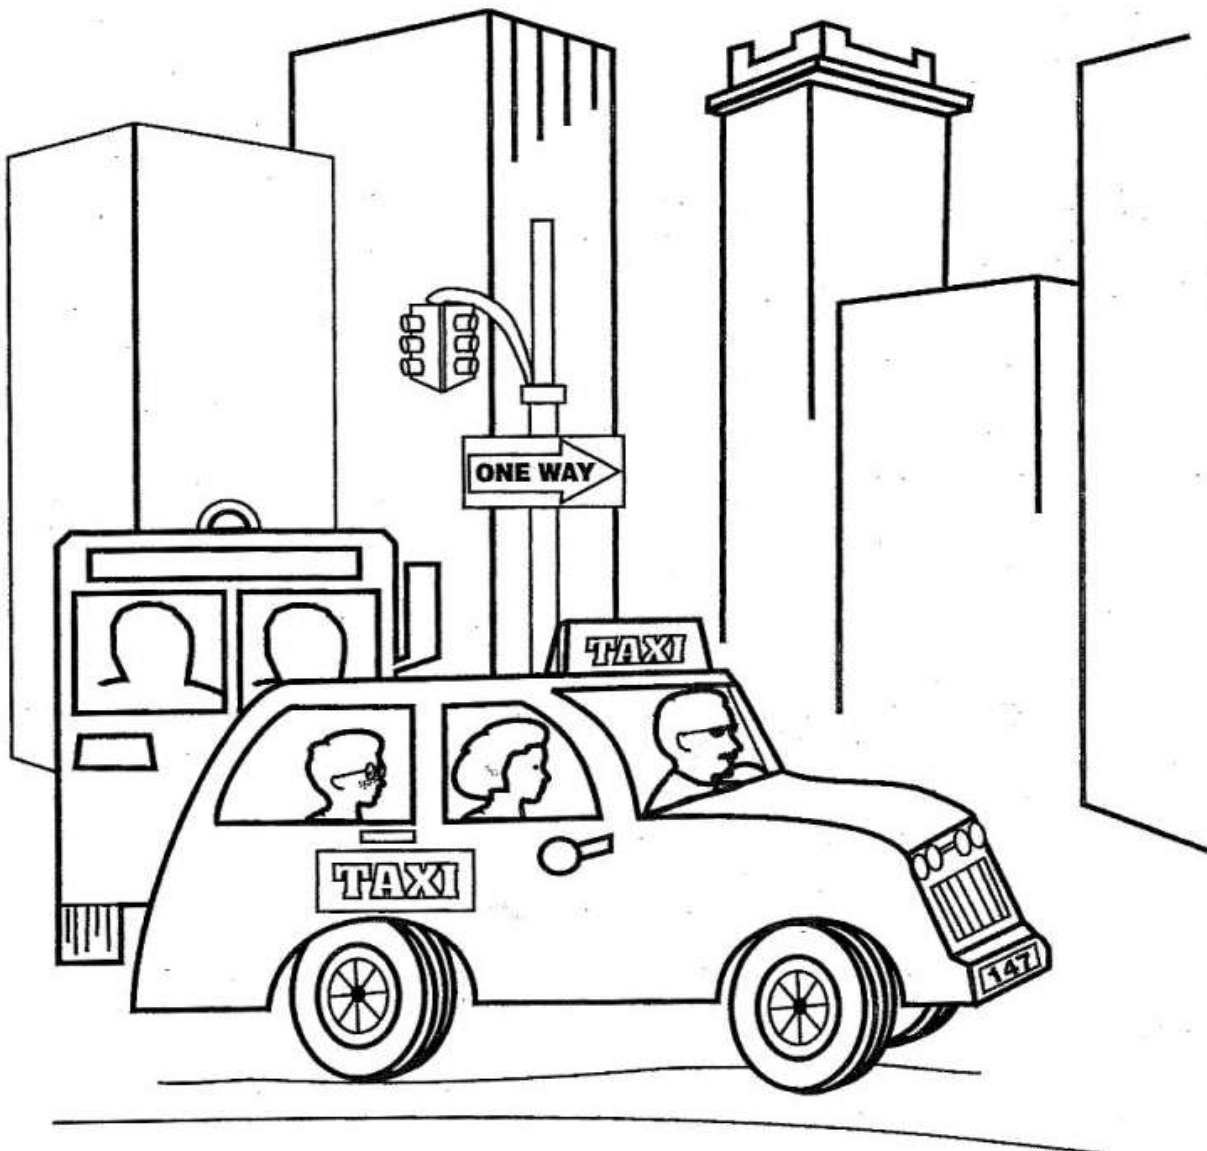

Materials:- One Picture Perfect handout (A), one Picture Perfect handout (B), a blank sheet of paper, and a pencil for each participant.

Process:

1. Instruct participants to form work groups with a maximum of four members in each group. Explain that participants will work with their groups in a team effort to compare the details of two very similar pictures (one of which they will only see for two minutes).
2. Distribute one copy of the Picture Perfect (A) handout, a blank sheet of paper, and a pencil to each participant. Explain that group members will have only two minutes to study the picture for details before working with their groups.
3. Announce start and stop times, allowing two minutes for the study process. After calling time, collect the pictures from all participants.
4. Distribute one copy of the Picture Perfect (B) handout to each participant. In their teams, group members are to compile a list of details that describe the differences between picture (A), which they studied earlier for two minutes, and Picture (B). Allow approximately five minutes for the groups to work together.
5. Redistribute the Picture Perfect (A) handouts for the groups to compare their answers. Provide the following solutions and have each team determine the number of correct answers.
