

Project

As part of the programme each participant must be involved in a short term project. This will be based on engaging with their community in order to identify a live community issue.

They must carry out this engagement following Unit 3 and will be asked to share their experiences of carrying out the project at a recall day.

- Stage 1: Planning for the consultation will begin as an element of unit 4 – an action plan developed by the participant about the community engagement they intend to carry out.
- Stage 2: Hold the community engagement session.
- Stage 3: Evaluate the community engagement session using appropriate methods.
- Stage 4: Reflect on their role and record this using the project recording sheet.
- Stage 5: Share their experience with other participants and appropriate stakeholders
